Dropout Prevention!

PATHFINDER SERVICES OF ND

Students report a variety of reasons for dropping out of school; therefore, the solutions need to be multidimensional. Pathfinder Services of North Dakota has produced content aimed directly at dropout prevention.

When looking at how to keep youth in school it comes down to a few key elements.

1. *PARENTAL INVOLVEMENT*
2. *SELF-EVALUATION*
3. *BEING ORGANIZED*

The dropout prevention content is designed to help students, their families, and the teachers they work with all come together to help students succeed.

We know that youth with under developed self-regulation skills struggle in school. We also know that when offered the opportunity to improve those skills school life becomes much less of a struggle. We know that parental engagement in a student's school life can be a great help. These new webinars dive a bit deeper into each of these topics. Each of these webinars contain information to help youth deal with common issues they will encounter in school. The Webinars offer strategies on how a youth's family can help, and go over the importance of building relationships in school with both peers and faculty.

The Drop Out Prevention Series is available virtually, face to face, or streaming through our website!

- *ORGANIZATION IS KEY*
- *COLLABORATION & CONNECTIONS*
- *TRIGGERS & CUES*
